Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to radiation-curable unsaturated polyesterurethane resins ABC.

Group II, claim(s) 6-9, drawn to Coating agents containing reactive diluents D and radiation-curable unsaturated polyesterurethane resins ABC according to claim 1.

Group III, claim 10, drawn to a method for coating substrates.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: the special technical feature common to all the independent claims is a radiation-curable unsaturated polyesterurethane resin ABC of claim 1, which is shown to be anticipated by US 6,541,535 to Blum et al of the same patent family as DE 19835849 described by Applicants in P2 of the Published Application. Blum et al teaches a radiation-curable unsaturated polyesterurethane resin ABC of claim 1 containing structural units derived from a polyester A (See column 5, lines 50-53), polyfunctional isocyanates B (See column 4, lines 41-45, 64-67; column 5, lines 1-2), and olefinically unsaturated monomers containing hydroxyl groups C (See column 5, lines 17-18). For these reasons the unity does not exist between the groups of claims.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
